

eClamp™

OPTIMIZE YOUR PRESS BRAKE

eClamp™ by Wilson Tool International, the world's first fully electric press brake clamp, is designed to simplify your operations and boost productivity.

Minimized Downtime
Enhanced Visibility
Unmatched Versatility

Easy Operation
Efficient Setups
Eco-Friendly

Experience the Future of Press Brake Clamping

FLEXIBLE BEAM SET UPS

Your Beam. Your Setup. Perfect Every Time.

eClamp™ features a modular design with precise adjustments, allowing unparalleled flexibility to create the ideal beam configuration — solid, gapped or partial.

Optimized Tool Spacing

Achieve peak efficiency in every setup with 20mm [.787"] finger spacing allowing for precisely placed tools.

See how easy and versatile
eClamp™ makes press brake setups.

ENHANCED VISIBILITY

Clearly Illuminated Workspace

Direct downlighting provides a clear, shadow-free view of the work surface. The improved operator visibility helps increase accuracy, reduce wasted material and speed production.

Improved Workflow

Better visibility contributes to faster cycle times and a more streamlined production process.

See eClamp™ lights in action.

INSTANT CLAMP STATUS

Easy Status Recognition

Operators can instantly see if press brake tooling is properly clamped and secured.

Increased Team Awareness

Easily see clamping status from a distance, enhancing coordination and safety across the team.

MINIMIZE DOWNTIME

Significant Cost Savings: Eliminate expenses associated with service calls and external labor.

Eliminate Downtime: Get back to production quickly by handling clamp maintenance yourself — no external service technician needed.

ECO-FRIENDLY

Smarter Shipping: Our smaller, more compact packaging reduces shipping costs and the overall carbon footprint.

All-Electric: Say goodbye to messy hydraulic fluid. The all-electric design eliminates waste and reduces your environmental impact.

UPGRADE OR INTEGRATE

Retro Fit Existing Machines: Upgrade your current press brake quickly and easily, extending its life and capabilities.

Future-Proof Your Investment: eClamp™ bodies integrate perfectly with new press brakes, ensuring long-term adaptability and superior performance.
