

Reduce Setup Time With Clamping Solutions From Wilson Tool

Minimizing setup time is key to achieving greater press brake productivity. Wilson Tool offers a variety of innovative clamping solutions designed to help manufacturers dramatically reduce the amount of time spent loading and unloading press brake tooling. We offer the fastest, most reliable clamping solutions in the industry.

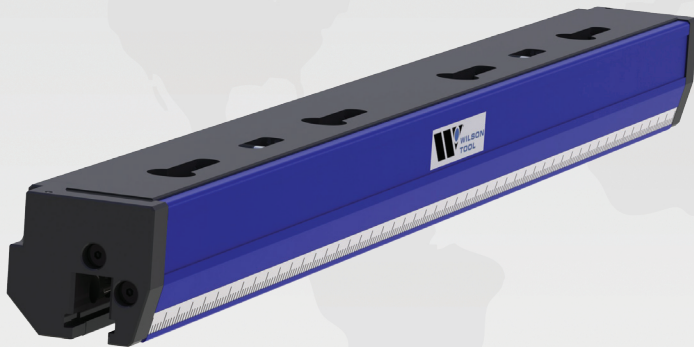

Whether you're looking for cost-effective mechanical clamping, simple push button setups or an ultra-fast hydraulic solution, Wilson Tool has a clamping system to meet your needs.

Increase Productivity on Your Existing Press Brake with the ExpressRail™ Clamping System.

Reach new levels of productivity on your existing press brakes with the new ExpressRail™ hydraulic clamping system from Wilson Tool. Simply load your tooling then press the button on the wireless pendant control to automatically clamp and seat your press brake tooling in seconds – enabling your operators to spend more time bending and less time setting up.

Available for Wila/Trumpf style of tooling, ExpressRail features a unique low-profile design which doesn't eat into the open height required for larger parts – increasing your bending capacity.

*The Wilson Tool HCS-W clamping system :
maximum productivity on your
new press brake - guaranteed.*

The Wilson Tool HCS-W system is a hydraulic clamping system for Wila / Trumpf style punches and

dies, offering the following benefits: the fastest tool change-overs; long-term reliability; ease of use: everything you need to maximise your press brake performance. In short, your operators spend more time bending and producing parts, less time in machine set-up.

Save Time and Money with the Wilson Express Clamping System.™

Loading punches is a snap with Wilson Express Clamps. Simply place long punches or individual pieces of sectionalised punches under the clamps and push them upward. The spring-loaded clamps capture the punch via a safety groove and hold it in place until the clamps are locked. To lock clamps, simply push the removable lever upward.

Available for virtually any make and model of press brake, the Wilson Express Clamping System is uniquely designed to increase your productivity and reduce your operating costs.

Reduce your set-up times with a clamping solution from Wilson Tool.
