

SPEND LESS. BEND MORE.

Wilson Tool International now stocks radius tool holders with replaceable tips, so you can spend less and bend more. We have expanded our offerings to give you more options, and with a variety of sizes in stock, you can count on a quick delivery.

Fast and Simple Fastening

We have developed a fast and simple fastening system that makes changing the radius tip faster and easier than ever. To remove the tip from the holder, simply loosen the hardware one turn. Insert the new tip and retighten. The hardware will automatically seat the tips into the holder when tightened.

Radius Punch Holders

These are laser hardened at the V-contact points to 52-60 HRC, and given a black oxide finish to provide rust protection. All holders are 500mm/19.68" in length and the American and WT holders have solid safety tangs.

Replaceable Radius Tips

The radius tips are interchangeable with Wilson Tool's American, European and WT style holders, and all of our tips are Nitrex® surface hardened to 70 HRC for maximum durability.

WILSON EUROPEAN STYLE HOLDER PART NO.	WILSON AMERICAN STYLE HOLDER PART NO.	WILSON WT STYLE HOLDER PART NO.	HOLDER WIDTH	TIP RADIUS SIZE	TIP PART NO.
