

MULTIPLY YOUR PUNCH PRESS CAPACITY

Your Options for Indexable Multi-Tools Just Got Better

Introducing the new 20-station MTX multi-tool from Wilson Tool International. With many of the same features as our MTX Ri Series, MTX20Ri-RR lets you expand the capabilities of your machine while maximising uptime and productivity. Tool changes are faster than ever with no tools required.

Universal Multi-Tool Features

- Increased Punch Grind Life: Punch length adjustment allows for 10mm grind life in 1.5mm material.
- Punch Length Adjustment: Quick and easy punch length adjustment with a simple twist of the punch head.
- Easy Tool Changes: Push-button release of ram striker and stripper retention allow for easy tool release.
- Sheet Marking Protection: Unused punches are held in the up position so they cannot contact the sheet.
- Tool Lubrication: Internal ports lubricate all moving parts.
- Station Identification: Tool stations marked with numbers for easy tool match up, reducing errors.
- Tool Length Adjustment: Groove machined into flange to visually set proper tool length.
