

Increased Grind Life for Trumpf® Style Dies

Cut your costs and save valuable time by increasing your grind life up to 150% with Wilson's "GL" (Grind Life) dies and die shoe. These products enable you to shim your dies up to 2.5mm instead of the current 1.0mm maximum.

* Patent pending

Also available for special shapes and Cluster tools

Shim Pack (GL) 1.0mm (X5)	26752	

GL Die

The radius profile of the Trumpf® GL die has been changed to allow up to 2.5mm of grind life with the GL die shoe, while still having radius left to allow the sheet to flow over the top of the die.

GL Die Shoe

The Wilson GL die shoe key allows for the die to be shimmed up to 2.5mm while still maintaining key engagement. The GL size 2 die shoe key contains a spring loaded ball plunger to better secure the dies, and is treated with Wilson Tool's black Nitrex™ surface enhancement for easy identification and reduced wear. The key is available separately and is compatible with standard Trumpf®-style dies and die shoes.
