

FAST & EASY CUSTOM STAMPS

Direct-from-the-mill sourcing and the largest tool steel selection readily available makes Impax Tooling Solutions®, a division of Wilson Tool International, your one-stop-shop for custom steel stamps. Our custom stamps are designed and manufactured to meet the wide range of needs of metal stampers.

- Automotive Standards
- Custom Applications
- Part Numbers & Serial Numbers
- Dates
- Company Logos & Custom Logos

Superior Performance with Tool Steel and Coatings

Wilson Tool has the largest variety of tool steel and coatings available to provide peak performance.

- Tool Steels: S7, D2, M2, PM-M4, 3V, 9V, 10V, Ultima® M4 and more
- Coatings: Optima®, Wearbeater™, Forte®, Slip-Max®, TiCrN and more

Lead Times in Days

When you provide a drawing with the following items, we will handle making the block, heat treatment, block finishing and engraving the letters in a matter of days — depending on design. Drawing requirements include:

- dxf, solid model, iges, etc.
- Include font of characters and character height
- Block or holder dimensions
- Tolerance requirements

Already have the block prepped? No problem! Just send it our way and let us know what is needed — we can take care of the rest.

Ease of Reordering

When you order a custom marking tool, Wilson Tool will provide CAD files and models to assist in the set up of the tool. To reorder, simply provide our team with the SO number on the tool, and we'll manufacture an exact replica of your custom tool.

Do you need other coining or embossing tools, or have a question on a custom stamp solution? Contact your local sales engineer or one of our tooling technicians today.

For more information, visit wilsontool.com, call our tooling technicians at 800.944.4671 or contact your sales engineer.
