

Increase your bending accuracy

Wilson Tool International has multiple, easy-to-use squaring options to help increase productivity and bending accuracy. Suitable for any press brake die with a flat surface, powerful magnets replace the need for screws or fastening tools and allow for easy repositioning. Angles can be set to match the part, ensuring that the bend is consistently in the right place.

NEW - Magnetic Squaring Block – Adjustable:

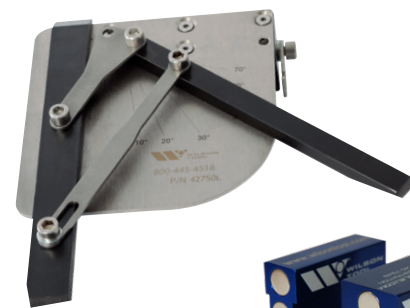

Tool free adjustment to infinite angles this block is adjustable for use as a left or right hand gauge. It is small in size yet big enough to provide a surface to rest the part.

Magnetic Squaring Arm:

Adjustable from 0° to 90° and available in left or right-handed versions for user preference and part requirements The flat surface provides a shelf for small components so operators can position the part and remove their fingers before bending. It can also be used as an end stop to accurately square Z-bends

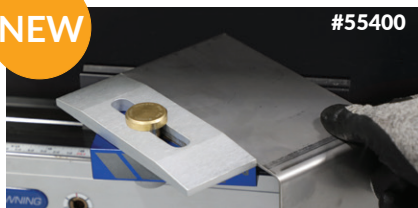

Magnetic Squaring Block:

Versatile and durable, this 90° squaring block can be used for left or right support and gauging. Strong magnets hold the lightweight tool in place and allow for easy repositioning.

CAT. NO	DESCRIPTION
55400	Magnetic Squaring Block Adjustable
47000	Right Hand Magnetic Squaring Arm
47001	Left Hand Magnetic Squaring Arm
55396	Left and Right Magnetic Squaring Block - suitable for all materials
55394	Left and Right Magnetic Squaring Block - suitable for Aluminium and Stainless Steel

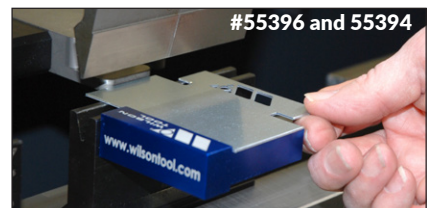

NEW

#55400

#47000 and 47001

#55396 and 55394
