

## EXTEND YOUR A-DIMENSION

### Maximize your A-dimension with the A-Plus® Series of tooling from Wilson Tool International

Extend the maximum size of forms possible in Trumpf-style tooling with the A-Plus® Series of forming tools.

This range of special tools extends the current boundaries of form size by 0.9" [25mm] or more, allowing TRUMPF and Pullmax machine users to produce louvers, lance & forms and card guides which were previously impossible on their machines.

#### A-Plus Series® Louver Tool

- Max length 4.0" [101.6mm]
- Extended range from 3.0-4.0" [76-101.6mm]
- Designed with built-in stripping in the lower unit for trouble-free travel and simple programming
- Replaceable forming unit available for cost-effective refurbishment

#### A-Plus Series® Lance & Form Tool

- Max length: 3.5" [88.9mm]
- Extended range from 2.48-3.5" [63-8.9mm]
- Ideal for long and narrow lance and forms

#### A-Plus Series® Card Guide Tool

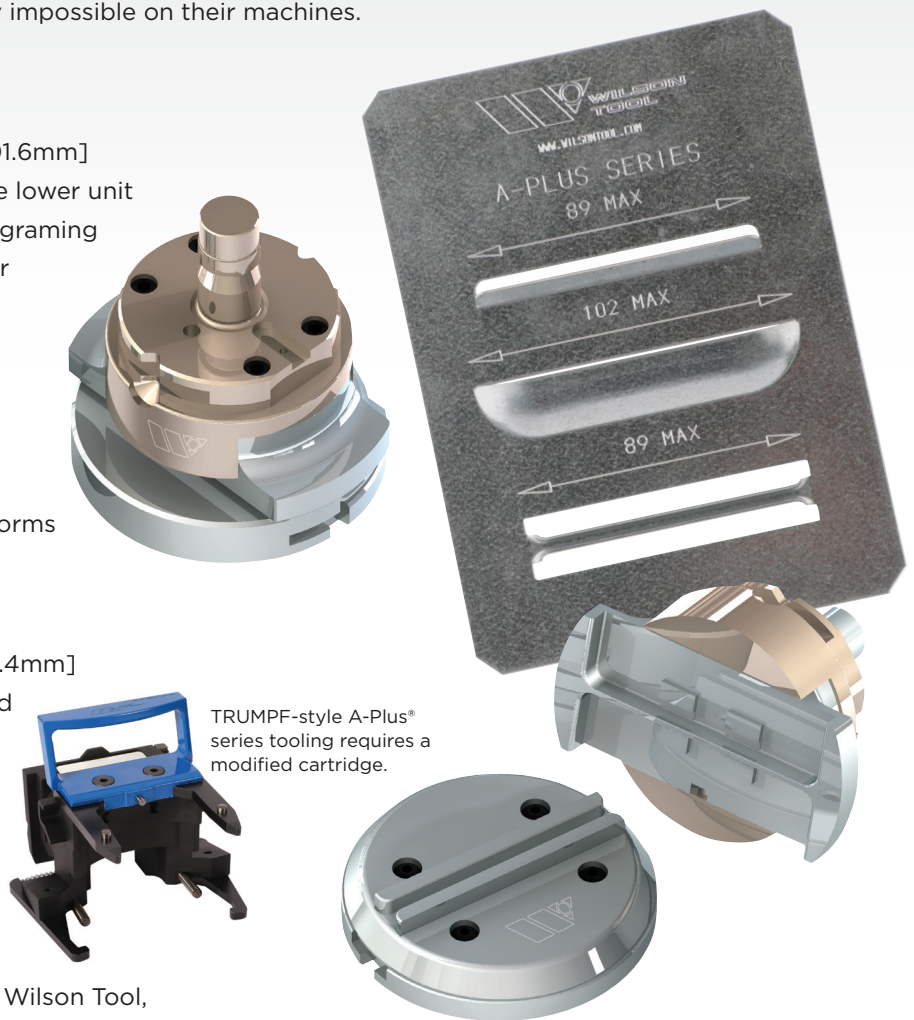

- Max length: 3.4" [86.4mm]
- Extended range from 2.8-3.4" [71-86.4mm]
- Provides vast savings when compared to expensive secondary operations such as plastic inserts

A-Plus series tooling is available for most TRUMPF Group I machines and the Pullmax 720 machine. Machine specifications subject to change. A modified tool cartridge, available from Wilson Tool, is required to run A-Plus Series tooling.
