

MULTIPLY YOUR PUNCH PRESS CAPACITY

Your Options for Indexable Multi-Tools Just Got Better

Introducing the new 20-station MTX multi-tool from Wilson Tool International. With many of the same features as our MTX Ri Series, MTX20Ri-RR lets you exponentially expand the capabilities of your machine while maximizing uptime and productivity. Tool changes are faster than ever with no tools required.

Universal Multi-Tool Features

- Increased Punch Grind Life: Punch length adjustment allows for .420" grind life in .059" material.
- Punch Length Adjustment: Quick and easy punch length adjustment with a simple twist of the punch head.
- Easy Tool Changes: Push-button release of ram striker and stripper retention allow for easy tool release.
- Sheet Marking Protection: Unused punches are held in the up position so they cannot contact the sheet.
- Tool Lubrication: Internal ports lubricate all moving parts.
- Station Identification: Tool stations marked with numbers for easy tool match up, reducing errors.
- Tool Length Adjustment: Groove machined into flange to visually set proper tool length.

MTX3Ri / MTX3Ri-RR Features

- Uses HP and EXP® B-station (1-1/4") punches*, and standard thick turret strippers and dies
- Max. material thickness of 1/4" (6.35mm); max. tonnage of 16 tons (142kN).

MTX8Ri / MTX8Ri-RR Features

- Uses HP and EXP® A-station (1/2") punches*, and standard thick turret strippers and dies
- Max. material thickness of 1/4" (6.35mm); max. tonnage of 7 tons (62kN).

MTX20Ri-RR Features

- Easy-to-use driver and punch
- Uses proprietary MTX20Ri punches, and standard MT20-8 strippers and dies
- Max. material thickness of 1/4" (6.35mm); max. tonnage of 4 tons (35kN).

*Punch holder required to use EXP® punch.
