

HP DURABLADE

Reduced Costs

The replaceable punch blade is made of Ultima®, a special powdered metallurgy high speed steel that gives you more hits between regrinds and helps to reduce down time.

Practical

With its patented HP push button length adjustment and stripper release, the DuraBlade assembly is quick and easy to use.

Increased profits

DuraBlade is designed for improved close to clamps operation. This means that more of the sheet is available to you and less material is wasted.

Accurate

The punch blade is fully guided right to the surface of the material, resulting in much cleaner results for your slitting/parting tasks and reduced wear and tear on the punch and die.

The DuraBlade assembly is available for the D & E stations of most thick turret machines in Standard and ABS configurations.

D Station DuraBlade

5663	Guide Assembly (HP)
5653	Guide Assembly (ABS)
5657	Punch insert (Max. A dim. 88.9mm*)
5656	Stripper (HP - relieved on 2 sides)
5665	Stripper (HP - relieved on 1 side)
5664	Stripper (HP-ABS - relieved on 2 sides)
5666	Stripper (HP-ABS - relieved on 1 side)

E Station DuraBlade

5639	Guide Assembly (HP)
5626	Guide Assembly (ABS)
5630	Punch insert (Max. A dim. 114.3mm*)
5629	Stripper (HP - relieved on 2 sides)
5641	Stripper (HP - relieved on 1 side)
5640	Stripper (HP-ABS - relieved on 2 sides)
5642	Stripper (HP-ABS - relieved on 1 side)

* A dimension = maximum diagonal distance across the corners
