

Introducing Urethane Coated Stripper Plates for Active Stripping Applications*

Each stripper plate has a bonded urethane layer applied to the stripper during the manufacturing process.

The addition of the Urethane layer helps reduce sheet marking on soft materials, whilst also reducing the noise level typically encountered from the stripper coming into contact with the sheet metal.

CAT. NO.	STRIPPER STYLE
26917	Round Urethane Coated Stripper to suit LVD PX, Pullmax, Haco and Technology
26918	Shaped Urethane Coated Stripper to suit LVD PX, Pullmax, Haco and Technology
26984	Trumpf® Style Round Urethane Coated Stripper Group H & I M/C
26919	Trumpf® Style Shaped Urethane Coated Stripper Group H & I M/C

* To suit LVD PX, Haco Q Series, Technology and Trumpf Style machines
