PRODUCT LINE CARD FOR PUNCHING

Wilson Tool's Punching division drives the industry with new levels of quality, delivery, service and innovation.

From the early days of Series 80 tooling to the Wilson Wheel® to innovative EXP® technology, our punching division has been the industry-leading innovation driver. When combined with the most experienced customer support professionals in the industry, Wilson Tool continues to raise the bar on performance and innovation. Thick turret, TRUMPF-style, Salvagnini-style, or any other style of punch press you may be using, Wilson Tool offers the most complete line of tooling solutions available today.

Specials may not be available for all tooling styles, material types and thicknesses. Discuss your tooling needs with your Sales Engineer or a Tooling Technician.

Specialty Coatings Shield Punches Against Wear

Do you deal with excessive galling? Are your punches wearing out faster than normal? Wilson Tool International offers four unique coatings for punch press applications to solve problems like these and more. Each coating provides distinct advantages depending on the problem you'd like to solve.

Wearbeater™ | Optima® | Nitrex® | Slip-Max®
